## A C T I V E W E A R

KEEZA is a Polish brand which brings together an experienced team of experts. Using our manufacturing potential, expertise and creativity of our team, we are ready to provide you with customer services and carry out deliveries at the best quality.

Our personnel of more than 150, based at our state-of-the-art machinery park including an embroidery shop, a knitting shop, a printing shop and a sewing shop ensures that our customers' orders are proces-

sed at high quality level and on time. We are capable of using highly diversified technologies designed to manufacture, personalise and decorate our clothing (sublimation transfer printing, screen printing, embroidery, thermal transfer). It is worth emphasizing that the sublimation printing technique which we use gives us design possibilities that are practically unlimited and can only be determined by the imagination of our customers.

Our team of graphic designers works to make sure that each order is unique and follows your suggestions.

Our individual approach to every customer is what makes the KEEZA brand unique. We hope that our philosophy of being your partner and not just a supplier of our customers will meet your expectations.

KEEZA Team

# TECHNOLOGIES:

## SEWING

**SEWING** - To meet each individual customer's expectations, we tailor our production technologies to your needs.

We offer a wide array of the **sewing technology** possibilities. Our diverse machinery park enables us to manufacture the highest quality products tailored to your expectations. We use such machines as: backstitch machines, overlock machines, flat seamer machines, rubber coating machines, embroidery machines etc. Thanks to our diverse technical equipment, we can manufacture advertising gadgets and professional sportswear **in a short period of time**.

## PRINTING

**SUBLIMATION** – The printing service most often delivered by us is sublimation. It is a transfer print technique which consists in transferring graphic design onto sublimation paper. Then, it is transferred onto a polyester material in high temperature environment.

Sublimation prints are characterised by **highly vivid colours and high resistance** to wear and washing, UV radiation and weather conditions.

We do our best to use environment-friendly technologies while promoting social responsibility. This is the sublimation technology. Use water-based paints which do not contain solvents. Our machinery, including machines supplied by such manufacturers as Rolland, Mimaki and Monti Antonio, enables us to diversify our product portfolio. We are ready to supply you with advertising gadgets such as e.g. cups and with professional sportswear.

The **essential characteristic property of the sublimation technology** is that printing is profitable even at low runs (1 piece) and printing can be done with full colour palette (e.g. photos).

**BRANDING WITH FLEX FOIL** – it is a technology which consists in cutting out a pattern in a special foil and hot-pressing it into material. The overprint is smooth and usually non-transparent although there are various types of the flex foil (from transparent to glittering and shining in the dark). This process can be run on textiles made of cotton, polyester, cotton and polyester blends and polyester and acrylic blends.

An overprint made of foil itself can be single-coloured or multi-coloured (the latter requires a longer production process, depending on the method used to combine colours and the order size). The selection of available colours depends on the foil manufacturer.

### Characteristic features of the technology:

- Foil appliques are profitable at small runs (even from 1 piece up),
- Overprint area maximum size is <math><50 \times 2500 \text{ cm}</math>,
- Foil durability depends on the frequency and hygiene of use and maintenance of the product.

\* In KEEZA we can also make a **latex imprint on flex foil** and then hot-press it into the product. Such solution requires carefulness, especially while maintaining the product – the durability of a product may be affected if it is frequently washed in detergents and exposed to UV radiation for a long time. It is a natural and inevitable property of this type of products.

**DIGITAL PRINTING ON TEXTILES** – we are one of the few in Poland to use the innovative KORNIT machine designed for digital printing on textiles (DTG – digital to garment). This technology consists in transferring print directly onto a ready product. It allows us to carry out orders on ready products provided to us by customers. An overprint is applied with the use of special-purpose water paints on cotton. Then it is fixed at high temperature. Regarding durability, the overprint is similar to screen printing.

### Characteristic properties of digital print on textiles:

- Similarly to sublimation, printing is profitable even at low runs (1 piece),
- Ready-made products can be printed,
- Overprint area maximum size is  $35 \times 45 \text{ cm}$ ,
- Printing can be performed without colour limitations
- High resolution and granularity make it possible to obtain good colours, gradients etc.
- We use water-based inks – NeoPigment – which are 100% non-toxic and biodegradable, fully human-safe and environment-friendly. The NeoPigment technology is compatible with the highest global standards, including Global Organic Textiles (GOTS-3V), Residues Standard List (RSL) and Oeko-Tex 100 – which means that the print is safe for children and infants.

**SCREEN PRINTING** – a printing technique where matrix is a fine mesh coated with light-sensitive emulsion and woven of synthetic fibres, stretched on a metal frame. The manufacturing process involves:

- making a graphic design followed by colour separation (separation into single colours),
- preparing a separate screen for each colour (hardening of light-sensitive emulsion in areas where there will be no design (exposure) and washing the emulsion off the area which will constitute the printing form,
- applying the overprint onto textiles by pressing the paint through screens (colour pressing 1, drying, colour pressing 2, drying etc.),
- drying and hardening the overprint,
- cleaning the screens.

We are one of the few in Poland to use a modern i-IMAGE ST machine for producing screens which enables us to meet your expectations with regard to delivery terms for low run orders (printing is profitable already for 30 pieces!) This has allowed us to go from the analogue technology (films) to the digital technology. In this way, we have achieved a measurable benefit for our customers because we have reduced production costs and shortened the lead time. Taking care of the natural environment, we have expanded our machinery park with a closed-loop system screen washer. It guarantees that none of the components will ever penetrate the soil.

The overprint made by the screen printing technique is **extraordinarily durable and resistant to washing and wear**. Since the manufacturing process is complicated, it becomes profitable from 30 pcs up.

Screen printing makes it possible to obtain **various final overprint effects** – e.g. it can be plain or rough, soft or hard, flat or convex, fluorescent etc.

**Characteristic features of the screen printing technology:**

- Printing is profitable for batches of more than 30 pcs,
- Overprint area maximum size is 48x50 cm.,
- We use human-friendly paints,
- Applicable mainly to cotton and other natural yarn textiles.

**LATEX PRINT** – this printing technique is used on paper substrates and various types of films. The unique property of the latex print is that it can be used on substrates of various types. It will work both on a low quality paper and on special purpose flex foils. The latex print meets the highest environmental and health standards. It is safe even for children.

To get more detailed information, send your inquiries to: [print@tomadex.pl](mailto:print@tomadex.pl).

## APPLICATIONS

**EMBROIDERY** – Our diverse technical equipment gives us extensive design possibilities. One design can contain up to 9 (or 15 in the premium variant) various colours and types of threads. We make embroideries with viscose and polyester.

The standard size is not bigger than 30x43 cm (although we can make an embroidery to the maximum size of 33x68 cm).

We can also sew appliques, sequins etc.

Our machinery enables us to apply embroideries on ready products.

## KNITTING

**KNITTING** – We specialise in making scarfs and hats but we can design a new product for an individual customer upon a special order (to discuss details, contact us at: [info@tomadex.pl](mailto:info@tomadex.pl)).

The primary raw material which we use to manufacture our knit products is **acrylic yarn**, more rarely wool.

Depending on the specific nature of the product, one product can contain maximum 6 colours in a row (a scarf) or 3 (a hat).

**Knitting products offered by our company have already won recognition in the sports world. They are used both by sports clubs (competitors and coaches of renown sports teams) and fans.**

## FOOTBALL KITS:

### OXFORD

- 100% polyester (thermo-active knit fabric made of high quality microfilament yarn)
- the material perfectly conveys moisture from the skin surface to the outside
- classical style makes it convenient to wear and does not constrain movements
- auxiliary variants: sublimation (any pattern), flex foil, embroidery (or applique)
- possibility of long sleeves
- male

**SIZES:** junior: 38.6-59.8 in / senior: XS-4XL

**COLORS:** white, yellow, orange, red, green, light blue, blue, navy blue, black

### OXFORD PLUS

- 100% polyester (thermo-active knit fabric made of high quality microfilament yarn)
- special mesh in critical spots ensures high comfort and free circulation of air even during intense physical effort
- ergonomic cut enables freedom of movement
- auxiliary variants: sublimation (any pattern), flex foil, embroidery (or applique)
- male

**SIZES:** junior: 38.6-59.8 in / senior: XS-4XL

**COLORS:** white, yellow, orange, red, green, light blue, blue, navy blue, black

## STOKE

- 100% polyester (thermo-active knit fabric made of high quality microfilament yarn)
- the material perfectly conveys moisture from the skin surface to the outside
- triangular neckline
- classical style makes it convenient to wear and does not constrain movements
- auxiliary variants: sublimation (any pattern), flex foil, embroidery (or applique)
- male

**SIZES:** junior: 38.6-59.8 in / senior: XS-4XL

**COLORS:** white, yellow, orange, red, green, light blue, blue, navy blue, black

## LINFORD

- 100% polyester (thermo-active knit fabric made of high quality microfilament yarn)
- it is made of a „meshwork“-structured knit fabric which improves transmission capacity
- raglan sleeves
- classical style makes it convenient to wear and does not constrain movements
- auxiliary variants: sublimation (any pattern), flex foil, embroidery (or applique)
- male

**SIZES:** junior: 38.6-59.8 in / senior: XS-4XL

**COLORS:** white, yellow, orange, red, green, light blue, blue, navy blue, black

## ROMSEY

- 100% polyester (thermo-active knit fabric made of high quality microfilament yarn)
- the collar gives elegant appearance
- ergonomic cut enables freedom of movement
- auxiliary variants: sublimation (any pattern), flex foil, embroidery (or applique)
- male

**SIZES:** junior: 38.6-59.8 in / senior: XS-4XL

**COLORS:** white, yellow, orange, red, green, light blue, blue, navy blue, black

## NORWICH

- 100% polyester (thermo-active knit fabric made of high quality microfilament yarn)
- the material ensures maximum comfort and body hygiene even in extreme conditions
- characteristic cut on the breast part, decorated with piping
- auxiliary variants: sublimation (any pattern), flex foil, embroidery (or applique)
- male

**SIZES:** junior: 38.6-59.8 in / senior: XS-4XL

**COLORS:** white, yellow, orange, red, green, light blue, blue, navy blue, black

## LEEDS

- 100% polyester (thermo-active knit fabric made of high quality microfilament yarn)
- the material ensures maximum comfort and body hygiene even in extreme conditions
- it is made of a „tear“-structured knit fabric which improves transmission capacity
- auxiliary variants: sublimation (any pattern), flex foil, embroidery (or applique)
- male

**SIZES:** junior: 38.6-59.8 in / senior: XS-4XL

**COLORS:** white, yellow, orange, red, green, light blue, blue, navy blue, black

## TIPTON

- 100% polyester (thermo-active knit fabric made of high quality microfilament yarn)
- raglan sleeves
- classical style makes it convenient to wear and does not constrain movements
- long sleeve provides protection on colder days
- auxiliary variants: sublimation (any pattern), flex foil, embroidery (or applique)
- male

**SIZES:** junior: 38.6-59.8 in / senior: XS-4XL

**COLORS:** white, yellow, orange, red, green, light blue, blue, navy blue, black

## LIVERPOOL

- 100% polyester (thermo-active knit fabric made of high quality microfilament yarn)
- the material perfectly conveys moisture from the skin surface to the outside
- the back of the shirt and appliques at sleeves are made of special mesh which improves ventilation of the garment, minimising the feeling of discomfort
- classical style makes it convenient to wear and does not constrain movements
- decorative insert made of contrasting knit wear at neckline adds elegance
- auxiliary variants: sublimation (any pattern), flex foil, embroidery (or applique)
- possibility of long sleeves
- male

**SIZES:** junior: 38.6-59.8 in / senior: XS-4XL

**COLORS:** white, yellow, orange, red, green, light blue, blue, navy blue, black

## PREMIUM

- 100% polyester (thermo-active knit fabric made of high quality microfilament yarn)
- special mesh in critical spots ensures high comfort and free circulation of air even during intense physical effort
- decorative insert made of contrasting knit wear at neckline adds elegance
- ergonomic cut enables freedom of movement
- auxiliary variants: sublimation (any pattern), flex foil, embroidery (or applique)
- male

**SIZES:** junior: 38.6-59.8 in / senior: XS-4XL

**COLORS:** white, yellow, orange, red, green, light blue, blue, navy blue, black

## WESTHAM

- 100% polyester (thermo-active knit fabric made of high quality microfilament yarn)
- the material perfectly conveys moisture from the skin surface to the outside
- the back of the shirt and appliques at sleeves are made of special mesh which improves ventilation of the garment, minimising the feeling of discomfort
- classical style makes it convenient to wear and does not constrain movements
- auxiliary variants: sublimation (any pattern), flex foil, embroidery (or applique)
- male

**SIZES:** junior: 38.6-59.8 in / senior: XS-4XL

**COLORS:** white, yellow, orange, red, green, light blue, blue, navy blue, black

## OXFORD LADY

- 100% polyester (thermo-active knit fabric made of high quality microfilament yarn)
- the material perfectly conveys moisture from the skin surface to the outside
- classic cut with slim cut underlines female shape and does not constrain movements
- very smooth and soft material
- auxiliary variants: sublimation (any pattern), flex foil, embroidery (or applique)
- female

**SIZES:** junior: 38.6-59.8 in / senior: XS-4XL

**COLORS:** white, yellow, orange, red, green, light blue, blue, navy blue, black

## NADINE

- 100% polyester (thermo-active knit fabric made of high quality microfilament yarn)
- the knit fabric does not accumulate moisture and allows heat ventilation
- classic cut with slim cut underlines female shape and does not constrain movements
- very smooth and soft material
- auxiliary variants: sublimation (any pattern), flex foil, embroidery (or applique)
- female

**SIZES:** junior: 38.6-59.8 in / senior: XS-4XL

**COLORS:** white, yellow, orange, red, green, light blue, blue, navy blue, black

## TIPTON LADY LONGSLEEVE

- 100% polyester (thermo-active knit fabric made of high quality microfilament yarn)
- the knit fabric does not accumulate moisture and allows heat ventilation
- classic cut with slim cut underlines female shape and does not constrain movements
- long sleeve provides protection on colder days
- very smooth and soft material
- auxiliary variants: sublimation (any pattern), flex foil, embroidery (or applique)
- female

**SIZES:** junior: 38.6-59.8 in / senior: XS-4XL

**COLORS:** white, yellow, orange, red, green, light blue, blue, navy blue, black

## IPSWICH

- 100% polyester (thermo-active knit fabric made of high quality microfilament yarn)
- classic, loosely cut shorts
- the material perfectly conveys moisture from the skin surface to the outside.
- adjustable belt size
- classical style makes it convenient to wear and does not constrain movements.
- auxiliary variants: sublimation (any pattern), flex foil, embroidery (or applique)

**SIZES:** junior: 38.6-59.8 in / senior: XS-4XL

**COLORS:** white, yellow, orange, red, green, light blue, blue, navy blue, black

## LINCOLN

- 100% polyester (thermo-active knit fabric made of high quality microfilament yarn)
- classic, loosely cut shorts
- adjustable belt size
- the material perfectly conveys moisture from the skin surface to the outside
- perforated side inserts provided to ensure the best ventilation
- attractive finish
- mesh lining
- auxiliary variants: sublimation (any pattern), flex foil, embroidery (or applique)

**SIZES:** junior: 38.6-59.8 in / senior: XS-4XL

**COLORS:** white, yellow, orange, red, green, light blue, blue, navy blue, black

## BURY

- 100% polyester (thermo-active knit fabric made of high quality microfilament yarn)
- classic, loosely cut shorts
- adjustable belt size
- the material perfectly conveys moisture from the skin surface to the outside
- classical style makes it convenient to wear and does not constrain movements
- auxiliary variants: sublimation (any pattern), flex foil, embroidery (or applique)

**SIZES:** junior: 38.6-59.8 in / senior: XS-4XL

**COLORS:** white, yellow, orange, red, green, light blue, blue, navy blue, black

keza

## GOALKEEPER KITS:

### CORDOBA LONG

- 100% polyester (thermo-active knit fabric)
- it is made of a „tear“-structured knit fabric which improves transmission capacity
- material resistant to mechanical damages
- ergonomic cut enables freedom of movement
- long sleeve provides protection on colder days
- extended back
- auxiliary variants: sublimation (any pattern), flex foil, embroidery (or applique)

**SIZES:** junior: 38.6-59.8 in / senior: XS-4XL

**COLORS:** white, yellow, orange, red, green, light blue, blue, navy blue, black

### CORDOBA SHORT

- 100% polyester (thermo-active knit fabric)
- it is made of a „tear“-structured knit fabric which improves transmission capacity.
- material resistant to mechanical damages
- ergonomic cut enables freedom of movement.
- extended back
- auxiliary variants: sublimation (any pattern), flex foil, embroidery (or applique)

**SIZES:** junior: 38.6-59.8 in / senior: XS-4XL

**COLORS:** white, yellow, orange, red, green, light blue, blue, navy blue, black

## SOUTHAMPTON

- 100% polyester (thermo-active knit fabric)
- it is made of a „tear“-structured knit fabric which improves transmission capacity
- material resistant to mechanical damages
- the blouse is equipped with foam protectors sewn into sleeves for better protection against injuries
- ergonomic cut enables freedom of movement
- auxiliary variants: sublimation (any pattern), flex foil, embroidery (or applique)

**SIZES:** junior: 38.6-59.8 in / senior: XS-4XL

**COLORS:** white, yellow, orange, red, green, light blue, blue, navy blue, black

## WATFORD LONG

- 100% polyester (thermo-active knit fabric)
- material resistant to mechanical damages
- adjustable belt size
- the knit fabric does not accumulate moisture and allows heat ventilation
- auxiliary variants: sublimation (any pattern), flex foil, embroidery (or applique)

**SIZES:** junior: 38.6-59.8 in / senior: XS-4XL

**COLORS:** white, yellow, orange, red, green, light blue, blue, navy blue, black

## WATFORD SHORT

- 100% polyester (thermo-active knit fabric)
- material resistant to mechanical damages
- adjustable belt size
- the knit fabric does not accumulate moisture and allows heat ventilation
- auxiliary variants: sublimation (any pattern), flex foil, embroidery (or applique)

**SIZES:** junior: 38.6-59.8 in / senior: XS-4XL

**COLORS:** white, yellow, orange, red, green, light blue, blue, navy blue, black

## REFEREE KITS:

### HOWARD

- 100% polyester (thermo-active knit fabric made of high quality microfilament yarn)
- the material ensures maximum comfort and body hygiene even in extreme conditions
- characteristic cut on the breast part, decorated with piping
- two pockets with Velcro-type fastening
- ergonomic cut enables freedom of movement
- auxiliary variants: sublimation (any pattern), flex foil, embroidery (or applique)

**SIZES:** junior: senior: XS-4XL

**COLORS:** white, yellow, orange, red, green, light blue, blue, navy blue, black

### JACK

- 100% polyester (thermo-active knit fabric made of high quality microfilament yarn)
- classic, loosely cut shorts
- adjustable belt size
- pocket on the backside
- the material perfectly conveys moisture from the skin surface to the outside
- classical style makes it convenient to wear and does not constrain movements
- auxiliary variants: sublimation (any pattern), flex foil, embroidery (or applique)

**SIZES:** senior: XS-4XL

**COLORS:** white, yellow, orange, red, green, light blue, blue, navy blue, black

# SOCKS:

## CROOK

- polypropylene 70%, cotton 25%, elastane 5%
- professional two-zone football socks made of two kinds of knit fabric
- special thermo-active knit fabric covers the shin part and allows moisture and heat removal
- the foot is made of a cotton mix, absorbs moisture, protects foot from burns and sore skin and provides high comfort of use through the duration of the effort
- sizes: mini (33-35), junior (36-38), senior (40-46)
- colors: white, yellow, orange, red, green, blue, black

## SPORTS SOCKS

- 80% cotton, 15% polyamide, 5% elastane
- made from the highest quality cotton
- perfect for workouts and everyday use
- flexible welt protects the sock from sliding and an additional welt on the instep stabilizes a sock in a shoe
- ventilation grids at the upper part of a foot enable better removal of moisture
- it is possible to print a coat of arms or a logotype (white base only)
- it is possible to order a sock with own logotype and in any color (more details shall be provided by a local distributor)
- standard color: white

# BALLS:

## CHALLENGE

- professional, hand-sewn match ball
- polyurethane - double-coated
- it has high elastomeric properties and is elastic when gripped
- good resistance to abrasion
- it is made of polyester and wax, which prevents water absorption.
- designed for being played both on synthetic and natural grass
- size 5

## DOMINATOR

- professional, hand-sewn match ball
- polyurethane - Lacquer coated
- special multi-layer structural mesh stretched under the external layer makes the ball fulfil the highest standards of shape and perimeter
- low water absorbency
- suitable for all weather conditions
- size 5

## TRIGGER

- professional, hand-sewn match ball
- polyurethane - Reinforced
- high elasticity ensures high durability of the external layer
- good resistance to abrasion
- designed for being played both on synthetic and natural grass
- size 5

## POLO SHIRT:

### ATLANTA

- 100% cotton
- elasticated ribbings on sleeves
- fastened with three buttons
- side cuts
- the collar gives elegant appearance
- auxiliary variants: embroidery

**SIZES:** junior: 38.6-59.8 in / senior: XS-4XL

**COLORS:** white, yellow, orange, red, green, light blue, blue, navy blue, black

## SWEATSHIRTS:

## PRESTON

- 100% Polyester (thermo-active knit fabric)
- the cut allows you to make unconstrained and independent movements
- express fastening along the entire length
- elasticated inserts at the bottom of sleeves
- the material has thermo-active and hydrophobic properties
- auxiliary variants: sublimation (any pattern), flex foil, embroidery (or applique)
- male

**SIZES:** junior: 38.6-59.8 in / senior: XS-4XL

**COLORS:** white, yellow, orange, red, green, light blue, blue, navy blue, black

## OLDHAM

- 100% Polyester (thermo-active knit fabric)
- the cut allows you to make unconstrained and independent movements
- express fastening along the entire length
- elasticated ribbings on sleeves and waistband
- the material has thermo-active and hydrophobic properties
- auxiliary variants: sublimation (any pattern), flex foil, embroidery (or applique)
- male

**SIZES:** junior: 38.6-59.8 in / senior: XS-4XL

**COLORS:** white, yellow, orange, red, green, light blue, blue, navy blue, black

## BUXTON

- 100% Polyester (thermo-active knit fabric)
- classical style makes it convenient to wear and does not constrain movements
- express fastening along the entire length
- side pockets with decorative stitch
- elasticated ribbings on sleeves and waistband
- the material has thermo-active and hydrophobic properties
- auxiliary variants: sublimation (any pattern), flex foil, embroidery (or applique)
- male

**SIZES:** junior: 38.6-59.8 in / senior: XS-4XL

**COLORS:** white, yellow, orange, red, green, light blue, blue, navy blue, black

## MANCHESTER

- 100% Polyester (thermo-active knit fabric)
- the cut allows you to make unconstrained and independent movements
- express fastening along the entire length
- elasticated ribbings on sleeves
- blouse bottom adjustable with stoppers
- the material has thermo-active and hydrophobic properties
- extended back
- auxiliary variants: sublimation (any pattern), flex foil, embroidery (or applique)
- male

**SIZES:** junior: 38.6-59.8 in / senior: XS-4XL

**COLORS:** white, yellow, orange, red, green, light blue, blue, navy blue, black

## WINCANTON

- 100% Polyester (thermo-active knit fabric)
- classical style makes it convenient to wear and does not constrain movements
- the cut is distinguished by its contrastive yoke with slanting zip
- elasticated ribbings on sleeves and waistband
- the material has thermo-active and hydrophobic properties
- auxiliary variants: sublimation (any pattern), flex foil, embroidery (or applique)
- male

**SIZES:** junior: 38.6-59.8 in / senior: XS-4XL

**COLORS:** white, yellow, orange, red, green, light blue, blue, navy blue, black

## GRIMSBY

- 100% Polyester (thermo-active knit fabric)
- the cut allows you to make unconstrained and independent movements
- elasticated ribbings on sleeves
- training style cut
- the material has thermo-active and hydrophobic properties
- auxiliary variants: sublimation (any pattern), flex foil, embroidery (or applique)
- male

**SIZES:** junior: 38.6-59.8 in / senior: XS-4XL

**COLORS:** white, yellow, orange, red, green, light blue, blue, navy blue, black

## VENTOR

- 100% Polyester (thermo-active knit fabric)
- the cut allows you to make unconstrained and independent movements
- perforated side inserts provided to ensure the best ventilation
- sleeve finished with ribbing with a thumb hole
- the ergonomic and fit cut underlines sporty posture
- the material has thermo-active and hydrophobic properties
- auxiliary variants: sublimation (any pattern), flex foil, embroidery (or applique)
- male

**SIZES:** junior: 38.6-59.8 in / senior: XS-4XL

**COLORS:** white, yellow, orange, red, green, light blue, blue, navy blue, black

## ROTHWELL

- 100% Polyester (thermo-active knit fabric)
- the cut allows you to make unconstrained and independent movements
- express fastening along the entire length
- elasticated ribbings on sleeves
- the material has thermo-active and hydrophobic properties
- auxiliary variants: sublimation (any pattern), flex foil, embroidery (or applique)
- male

**SIZES:** junior: 38.6-59.8 in / senior: XS-4XL

**COLORS:** white, yellow, orange, red, green, light blue, blue, navy blue, black

## LYON

- 100% cotton
- the cut allows you to make unconstrained and independent movements
- raglan sleeves
- elasticated ribbings on sleeves and waistband
- auxiliary variants: screen printing, embroidery (or applique)
- male

**SIZES:** junior: 38.6-59.8 in / senior: XS-4XL

**COLORS:** white, yellow, orange, red, green, light blue, blue, navy blue, black

## SUNDERLAND

- 100% Polyester (thermo-active knit fabric)
- the cut allows you to make unconstrained and independent movements
- elasticated ribbings on sleeves
- the material has thermo-active and hydrophobic properties
- auxiliary variants: sublimation (any pattern), flex foil, embroidery (or applique)
- female

**SIZES:** junior: 38.6-59.8 in / senior: XS-4XL

**COLORS:** white, yellow, orange, red, green, light blue, blue, navy blue, black

## NAILSWORTH

- 100% Polyester (thermo-active knit fabric)
- the cut allows you to make unconstrained and independent movements
- elasticated ribbings on sleeves
- the material has thermo-active and hydrophobic properties
- auxiliary variants: sublimation (any pattern), flex foil, embroidery (or applique)
- female

**SIZES:** junior: 38.6-59.8 in / senior: XS-4XL

**COLORS:** white, yellow, orange, red, green, light blue, blue, navy blue, black

## GETAFE

- 100% cotton
- the cut allows you to make unconstrained and independent movements
- elasticated ribbings on sleeves and waistband
- stylish, two-layer hood
- auxiliary variants: screen printing, embroidery (or applique)
- female

**SIZES:** junior: 38.6-59.8 in / senior: XS-4XL

**COLORS:** white, yellow, orange, red, green, light blue, blue, navy blue, black

# TRAINING PANTS:

## CARDIFF LONG

- 100% Polyester (thermo-active knit fabric)
- loose cut with high ribbing on calves (knee – ankle)
- the model is designed mainly for training football
- the material has thermo-active and hydrophobic properties
- auxiliary variants: sublimation (any pattern), flex foil, embroidery (or applique)
- male

**SIZES:** junior: 38.6-59.8 in / senior: XS-4XL

**COLORS:** white, yellow, orange, red, green, light blue, blue, navy blue, black
